CES Group Exhibits **GREEN** Air Conditioning Solutions

Eden Prairie, MN (November 2, 2009)—Visit the CES Group™ at the Greenbuild International Conference & Expo in Booth 3371, November 10-12, at the Phoenix Convention Center in Arizona. See solutions such as Mammoth® water-source/ground-source heat pumps (WSHP), and HUNTAIR® FANWALL TECHNOLOGY® fan upgrade and air handler solutions.

Ground-Source Heat Pump Benefits to Building Owners:

- Can use earth or cooling tower as a heat source and sink saving on building space and energy use.
- Unit is ground-source ready out of the box, which saves on installation time and cost.
- Mammoth heat pumps come in a variety of sizes to fit almost any application.
- Ability to accommodate widely varying internal heating and cooling zones.

FANWALL TECHNOLOGY Benefits to Building Owners:

- Increase reliability through redundancy of fans.
- Lower energy bills and connected load with smaller, high energy efficiency fans.
- Quiet air handling system down, especially in low frequencies.
- Reduce footprint of air handler by as much as 50% to return real estate to the owner.
- Lower maintenance costs with no belts to change or bearings to grease.

The companies affiliated with the CES Group™ are some of the world's leading custom-engineered air conditioning manufacturers, offering a full range of products from ½ to 2000+ tons and 200 to 400,000+ cfm, and sold under such leading brands as CLEANPAK®, Governair®, HUNTAIR®, Mammoth®, Temtrol®, Venmar CES™, Ventrol®, WEBCO™, and Eaton-Williams®. Why settle for a packaged answer when the CES Group can provide innovative, custom-engineered green solutions for today's most challenging HVAC applications? Find a CES Group Representative by visiting www.ces-group.com.
